

CSA0613 - Design and Analysis of Algorithms

CO5-AT-3-Mock Interview

Divyesh S P (192424147)

Result:

Excellent. That is a correct application of **Branch and Bound** to route optimization.

 **Mock Interview Completed!**

You answered all **10 questions** successfully.

Overall feedback:

- ☒ Backtracking concepts: **Good**
- ☒ N-Queens: **Good**
- ☒ Subset Sum: **Good**
- ☒ Pruning: **Good**
- ☒ Hamiltonian vs Eulerian: **Excellent**
- ☒ Graph Coloring: **Good**
- ☒ Branch and Bound: **Excellent**
- ☒ Complexity: **Good**
- ☒ Backtracking vs Brute Force: **Good**
- ☒ Real-world application: **Excellent**

Estimated performance: 9/10 ★

Your answers were **short, clear, and technically correct**, which is ideal for a viva/mock interview. One small improvement: for complexity questions, you can briefly explain *why* the complexity occurs rather than giving only the Big-O notation.
